PROFESSIONAL SUMMARY

High-performing Full-Stack Software Engineer with 4+ years of hands-on experience architecting scalable web, mobile, and AI systems for enterprise and public-sector environments. Proven expertise in multi-tenant database design, secure API development, and high-throughput asynchronous queue management. Deploys rigorous software engineering methodologies and systematic performance optimization to modernize national-scale financial infrastructure and eliminate operational bottlenecks.

SKILLS AND COMPETENCIES

Backend & API Engineering: PHP (Laravel, Livewire), Python (Django, FastAPI), Node.js (NestJS, Fastify), RESTful API Architecture, Event-Driven Systems

Frontend & Mobile Development: JavaScript, TypeScript, React, Next.js, Dart (Flutter), UI/UX Design (Figma)

Databases & Cloud DevOps: MySQL, PostgreSQL, Redis, Prisma, ObjectBox, Git, Docker, Linux, Azure, CI/CD Pipelines

System Design & Methodologies: Multi-Tenant Architecture, Fiscalization/Statutory Compliance, Queue-Based Pipelines, Agile Team Collaboration

PROFESSIONAL EXPERIENCE

LADS Africa – Harare, Zimbabwe

2021 –

Present

Software Developer

- Architected and deployed a multi-tenant local-authority ERP platform currently live at 60+ councils nationwide, digitizing manual paper-based revenue collection systems and saving approximately 10 hours per week in manual reconciliation per council.
- Re-engineered heavy batch reporting workflows into an asynchronous, queue-based pipeline utilizing Laravel Queues and Redis, cutting report generation times from ~15 minutes to under 30 seconds and successfully mitigating peak-billing application timeouts.
- Integrated ZIMRA fiscalization frameworks end-to-end to ensure strict statutory compliance for 60+ local authorities, securely processing over \$25M+ in national revenue and unblocking legally-required e-invoicing pipelines.
- Collaborated within a 15-engineer technical team to own full-stack feature delivery end-to-end, standardizing robust REST contracts between Laravel/Django backends and React interfaces to accelerate velocity and decrease integration rework.

SELECTED ENGINEERING PROJECTS

LADS Local Authority ERP (*Laravel, Livewire*) – Powered national-scale revenue collection for 60+ councils featuring ZIMRA fiscalization and Redis-driven asynchronous report rendering.

MineraERP – Mining ERP (MMCZ) (*Laravel 13*) – Developed an IAS 16 asset-revaluation engine with integrated ZIMRA/ASYCUDA systems to automate complex statutory customs-export accounting and eliminate manual filing errors.

MinutePark – Parking Enforcement (*Flutter, Laravel*) – Built an offline-first mobile application using Flutter and ObjectBox with integrated Bluetooth printing capabilities to ensure continuous revenue capture regardless of field connectivity.

Algorithmic Trading Bot (*FastAPI, React*) – Engineered an event-driven quantitative trading backend with FastAPI, React, and WebSockets, incorporating automated historical backtesting and automated risk-management layers across Deriv/Alpaca live streams.

Biometric ATM System (*Django, React*) – Implemented a secure authentication layer using Django, React, and WebAuthn for fingerprint biometric registration with AES-encrypted template storage and a built-in financial fraud mitigation engine.

SahwiGate – Athletics API (*Fastify, Prisma*) – Designed a high-throughput athletics backend utilizing Fastify, Prisma, and BullMQ job queues with integrated Stripe payment processing and automated Swagger documentation.

EDUCATIONAL QUALIFICATIONS

Bachelor of Technology Honors Degree in Software Engineering 2020 – 2025

Harare Institute of Technology

Key Coursework: *Enterprise Software Architecture, Database Systems Engineering, Distributed Systems, Advanced Web Engineering, Mobile Application Development, Artificial Intelligence & Machine Learning.*

PROFESSIONAL HIGHLIGHTS & LANGUAGES

Key Highlights: 4+ years shipping production software, 10+ full-stack/mobile/AI systems deployed, extensive cross-functional team leadership (15+ engineer environments).

Languages: English (Fluent), Shona (Native)
