

ADONIS T MUSHONGA

FULL-STACK SOFTWARE ENGINEER | IT CONSULTANT | PROJECT MANAGER

+263 775 450 425 | adonistmushonga@gmail.com | Harare, Zimbabwe | adonist02.github.io | github.com/adonisT02

PROFILE SUMMARY

Full-Stack Software Engineer, Project Manager and Software Consultant with 5+ years of experience delivering ERP, budgeting, POS, CRM, public websites, mobile and AI-assisted platforms. Experienced in Laravel/PHP, React, Django, Flutter, Java, NodeJs, SQL databases, API integration, debugging, client training and production support. Worked on systems for Zimbabwean councils, MMCZ, Nyaradzo/SahwiGate and private businesses, with strong ability to turn client needs into usable, secure and scalable software.

CORE STRENGTHS	TECH STACK	EDUCATION & LANGUAGES
• Full-stack development • ERP & business systems • API integration • Advanced debugging • Client training/support	• Laravel/PHP, Livewire • Python, Django/DRF • React, Next.js, Vue.js • Flutter/Dart, Java • PostgreSQL, MySQL, Redis	• Harare Institute of Technology • BTech Software Engineering • Shona - Native • English - Fluent

PROFESSIONAL EXPERIENCE

Program Based Budgeting Project Manager & Full-Stack Developer - LADS Africa Jun 2022 - Present

- Lead development, rollout and support of the Program Based Budgeting system used by 65+ Zimbabwean councils.
- Maintain ERP modules for budgeting, procurement, vouchers, markets, business licensing, approvals and reporting.
- Coordinate demos, stakeholder feedback, training, support, issue resolution and performance/database optimization.

Tech/Tools: Laravel, Livewire, PHP, PostgreSQL, MySQL/MariaDB, Python, Flutter, REST APIs

Full-Stack Engineer - ERP & Website Project - MMCZ Project-Based

- Worked as a full-stack engineer on the MMCZ project, contributing to the development of an ERP for internal business workflows.
- Developed the MMCZ public website and added the project link: <https://mmcz.co.zw>.
- Supported frontend/backend implementation, database-driven modules, testing, debugging, deployment support and user feedback cycles.

Tech/Tools: ERP development, web development, PHP/JavaScript, SQL databases, APIs, hosting/deployment support

Software Consultant & Development Contributor - Nyaradzo / SahwiGate Athletics 2026 - Present

- Provide consultancy support on the SahwiGate Athletics platform, covering portal improvements and API integration work.

- Contributed to director portal, club-management and mobile/web workflows by connecting frontend screens with backend services.
- Worked on search, pagination, data-loading reliability, auth-aware interface behavior and frontend security considerations.

Tech/Tools: React, TypeScript/JavaScript, pnpm/Turbo, REST APIs, Git/GitHub, OWASP-aware frontend practices

Senior Software Developer / Backend Developer - CountryBikes Solutions &
BlueBlazeTech

Jul 2023 - Jun 2025

- Built and maintained a multi-currency POS platform with sales, invoices, receipts, stock movements, cashier sessions and reports.
- Implemented fiscalization support, approval-based voiding, exchange-rate handling and synced mobile POS workflows.
- Developed CRM and self-service tools for client management, invoicing, support requests and account management.

Tech/Tools: Laravel, Vue.js, Flutter, Redis, Hive, MySQL/MariaDB, REST APIs

ADONIS T MUSHONGA

Selected Projects, Systems and Technical Strength

SELECTED PROJECTS & APPLICATIONS

Project / App	Contribution & Value	Tech / Domain
PBB System	Enterprise budgeting and reporting solution deployed to 65+ councils; supported demos, rollout, training and product improvements.	ERP, budgeting, Laravel, PostgreSQL
MMCZ ERP & Website	Full-stack contribution to an ERP system plus development of the MMCZ public website: https://mmcز.co.zw .	ERP, web development, APIs, SQL
SahwiGate Athletics	Athletics platform contribution for Nyaradzo consultancy work; UI/API integration, portal workflows and frontend reliability.	React, APIs, Git, security
BluePOS System	Scalable POS platform with multi-currency payments, stock, receipts, invoices, fiscalization and management reports.	Laravel, Vue, Flutter, fiscalization
CRM & Client Portal	Role-based client management, invoicing, account management and support workflow platform for business customers.	Laravel, APIs, MySQL
BlueBlaze Self-Service App	Mobile/self-service app for invoices, support, account access and customer communication.	Flutter, APIs, mobile
Smart Growth AI / Student Path	Student performance and career-path platform with assessments, skill tracking, assignments and predictive insights.	Django, React, ML concepts
MediGuard / Skill Connect	QR-based clinic inventory concept and mobile-first marketplace concept for verified informal service providers.	Django/React, QR, RBAC, marketplace
Java Business Systems	Java-based prototypes for inventory, records, authentication, CRUD operations, reports and database connectivity.	Java, JDBC, MySQL, Swing/JavaFX
Imba Mute Lodge Website	Hospitality website showcasing lodge services, contact information and customer-facing content.	Web design, hosting, CMS/web

ADDITIONAL TECHNICAL VALUE

System Development Requirements, database design, APIs, frontend implementation, testing and deployment support.	Client Support Demos, training, issue triage, documentation and translating client needs into usable features.
Database & Performance Schema design, query optimization, reporting, data migration and production debugging.	Security-Aware Engineering Authentication, authorization, RBAC, audit trails, role workflows and safer API/data handling.
